

HEMAL SHAH

Bharuch, Gujarat, India – 392001

hemal.shah2004@gmail.com | +91-8320278775 | github.com/hemal9102

PROFESSIONAL SUMMARY

Final-year Computer Science student and aspiring AI Agent Developer specializing in full-stack architecture, workflow automation, and Large Language Model (LLM) integrations. Experienced in building scalable, real-world AI applications, utilizing technologies such as Claude MCP servers, GraphRAG pipelines, and n8n orchestration. Passionate about automating complex business operations through conversational AI, OCR integrations, and robust backend engineering.

TECHNICAL SKILLS

AI & Automation: AI Agent Development, Conversational AI, GraphRAG, RAG pipelines, n8n, Claude MCP Servers, OCR, Reinforcement Learning (RL), Prompt Engineering

Programming Languages: Python, C, C++, C#, JavaScript

Backend & Frameworks: FastAPI, Node.js, HTTP/REST APIs, BeautifulSoup, Puppeteer

Databases: PostgreSQL, Supabase, MongoDB, pgvector

DevOps & Tools: Docker, Git, GitHub CI/CD, Render, Railway, Hostinger, PowerBI, Unity

PROFESSIONAL EXPERIENCE

Inddig Media Pvt Ltd | *Website, Python & Automation Developer*

March 2026 – Present

- Architected and deployed an AI-driven medical appointment system using FastAPI and Google Calendar API, enabling automated event creation and patient management for healthcare providers.
- Navigated complex Google Cloud Console OAuth verification to secure "Google App Verified" status for enterprise integrations.
- Engineered a scalable backend utilizing PostgreSQL hosted on Railway, managing DNS and subdomain routing via Hostinger.
- Implemented a CI/CD pipeline using GitHub Live Server for real-time frontend updates, ensuring zero-downtime deployments.
- Revolutionized a legacy PHP-based Google Review system by implementing a modern automation layer using n8n, VS Code, and Claude MCP servers, drastically reducing manual overhead for 400+ client profiles.
- Redesigned authentication logic by integrating a PHP-to-HTTP bridge and robust Google Refresh Token rotation.

SentimentAI | *AI Engineer*

July 2025 – July 2025

- Developed a Telegram Bot Agent integrated with n8n that allows users to upload PDFs/images and perform intelligent document Q&A and file analysis via conversational AI.
- Built an Invoice Automation system utilizing PDF parsers and OCR APIs to extract key fields (items, prices, totals) and structured the data for storage pipelines.
- Created automated data extraction tools, including a Google Maps Scraper and a LinkedIn Scraper using Python, Puppeteer, and BeautifulSoup to support lead generation and competitor research workflows.

Techicom | *Data Science AI Intern*

June 2025 – July 2025

- Developed a daily sales prediction model to help local vendors forecast demand and optimize inventory.
- Managed end-to-end data pipelines (EDA, preprocessing, feature engineering) and built interactive Power BI dashboards.

KEY AI PROJECTS

TrendGraphAI (*Python, FastAPI, GraphRAG, PostgreSQL, pgvector, Groq API, Docker*)

Jan 2026 – Apr 2026

- Engineered a comprehensive research intelligence platform utilizing semantic vector search and automated data extraction.
- Architected hybrid infrastructure combining Supabase database management and Docker containerization.

AI-Driven Disease Detection Application (*FastAPI, Supabase, AI Modeling*)

2026

- Engineered a hybrid-architecture healthcare application focusing on intelligent disease detection, successfully structuring project budgets and system design to secure a 2.5 Lakh SSIP grant for research and implementation.

Chess AI Engine (*Unity, C#, Reinforcement Learning*)

Apr 2025 – May 2025

- Developed a complete, fully functional chess game featuring advanced AI opponent integration utilizing Reinforcement Learning (RL) algorithms within the Unity game engine.

GitLite Clone (*FastAPI, Docker, Render, JWT*)

Dec 2025

- Developed a GitHub-style backend application with secure JWT-based authentication and containerized deployment.

EDUCATION

GSFC University

Vadodara, Gujarat

B.Tech. in Computer Science & Engineering – School of Technology (*CGPA: 7.12/10*)

2022 – 2026

- **Certifications & Training:** Full-Stack Web Development Training (Bolt, V0, Prompt Engineering); Participant at International Conference ICON-AI-SMT'25.
